

Applications

- Plastic single use loops for inoculation of colonies to growth media or for staining slides

Features

- Acid Resistant
- Choice of hard/rigid or soft/flexible loops to cover all microbiologist applications
- Unique design providing a consistent volume transfer
- Uniform and smooth streaking without agar cutting
- Designed for a double use: one side for transporting colonies and the other for petri dishes streaking
- Loops' shaft is designed with hexagonal shape for better grip and easy control
- Packed in sterile peel pouch
- Supplied in different packaged quantity per pouch (1, 5, 10 or 20 pcs/pouch) or pack.
- Calibration certificate can be provided for accuracy and precision using Evans Blue Dye Method
